### **DETAILED ACTION**

Claims 1-23, 28 and 29 are currently presented and have been examined.

It is noted that a new Examiner has been assigned to this application. Any future correspondence regarding this application should be directed to the Examiner listed below.

### ***Response to Arguments***

Applicant's arguments, see pages 10-22 of the response filed 26 January 2007, with respect to the rejection(s) of claim(s) 1-23, 28, and 29 under Buist, Barth, and Lara have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-23, 28, and 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-23, 28, and 29 recite wherein the "routing entries each comprising an action identifier" and wherein "the parent

node and the child routing node each operable connected to the computer network to receive service action requests including action identifiers from subscribing nodes; and route the service action requests to respective service providing endpoints associated with the network resource locators corresponding to the action identifiers". It is unclear as to which "action identifiers" are being referred to since the claims are inconsistent with the disclosures of the specification as to what constitutes an "action identifier". See MPEP 2173.03. There is no clear disclosure within the specification, specifically on pages 25 and 26, of an "action identifier", therefore, the claims fail to particularly point out what is claimed since the "action identifier" is used to route requests and, based on the specification, is not clear as to what identifier is being used.
